G0249	Provide inr test mater/equip
G0506	Comp asses care plan ccm svc
G2058	CCM add 20min
G0444	Depression screen annual

**\*Notes:** Effective as of March 1, 2020 and for the duration of the COVID-19 Public Health Emergency (PHE), hospital outpatient services can be furnished when the patient, who is a registered outpatient of the hospital, is in a temporary expansion location, including his or her home, when such a location is considered to be a provider-based department of the hospital as permitted under the waivers in effect during the COVID-19 PHE. Only in the case that both audio and video are not possible can the service be furnished exclusively with audio. Please refer to the interim final rule with comment period displayed on April 30, 2020 for more details on this policy.

This list includes HCPCS codes as examples of the outpatient therapy, counseling, and educational services that hospital clinical staff can furnish remotely incident to a physician's or qualified NPP's service during the COVID-19 PHE to a beneficiary in their home or other temporary expansion location that functions as a PBD of the hospital when the beneficiary is registered as an outpatient of the hospital. We note that this list may not include every service that falls into this category and we intend to update the list periodically, to the extent that would be helpful for public awareness.

When these services are furnished by hospital clinical staff within their scope of practice, the hospital should bill for these services as if they were furnished in the hospital and consistent with any specific requirements for billing Medicare during the COVID-19 PHE. When these services are provided by clinical staff of the physician or other practitioner and furnished incident to their professional services, and are not provided by clinical staff of the hospital, the hospital would not bill for the services.
