Patent Prosecution, Counseling & Review ■ Intellectual Property

Using his background in computer science, Michael Golden assists the patent prosecution team with drafting and prosecuting patents in the fields of software development, artificial intelligence, machine learning, data science, augmented/virtual reality, image processing, and object recognition. Before joining Alston & Bird full time, Michael participated in the firm's Patent Agent Intern program where he was able to gain real world experience in the patent prosecution process.

Michael is a graduate of North Carolina State University with a bachelor's in computer science.

Representative Experience

- Preparing and prosecuting patent applications related to artificial intelligence, machine learning, and data science for a multinational software company.
- Preparing and prosecuting patent applications related to augmented reality, image processing, and object recognition for a multinational software company.
- Preparing and prosecuting patent applications related to electrical circuitry for a large hardware manufacturer.
- Assisting litigators by executing exhaustive research to find evidence in support of legal arguments.
- Performed patentability, infringement, invalidation, and freedom-to-operate (FTO) searches for clients across multiple industries.

Education

- North Carolina State University (B.S., 2023)
